

**PROGRAMS TO IMPROVE THE RETENTION AND  
SUCCESS OF UNDERSERVED STUDENTS AT  
COLORADO PUBLIC INSTITUTIONS:**

**REPORT TO THE EDUCATION COMMITTEES OF THE COLORADO GENERAL  
ASSEMBLY IN RESPONSE TO HB 06-1024**

APRIL 2007

The purpose of this paper is to describe the programs and services designed to address the retention and success of underserved students enrolled at public colleges and universities in Colorado. Information in this report was provided to the Colorado Department of Higher Education in response to HB 06-1024.

Prepared by:

## OVERVIEW, REPORT HIGHLIGHTS, AND IMPLICATIONS

### *OVERVIEW*

The purpose of this report is to describe the programs and services designed to support underserved students at Colorado’s public colleges and universities. This report was prepared in response to HB06-1024 Concerning Underserved Students at Institutions of Higher Education, which requires each governing board to prepare and submit a report regarding underserved students to include:

- a. The programs and services that each state institution of higher education under the governing board’s control provides to address the retention and success of underserved students; and
- b. Additional programs or services for underserved students that the state institution of higher education would propose to provide and the related costs for the implementation of those proposed programs or services.

The Department of Higher Education (DHE) collected information for this report from all public colleges and universities in the state. Institution-specific reports appear in appendices A (four-year colleges) and B (two-year colleges) of this report.

It is important to note that while HB06-1024 requested a response by the state’s public two and four-year institutions, section 23-5-135, C.R.S.); the DHE did not create and disperse a report template to the institutions for the collection and presentation of the data provided herein. As such, submissions from the state’s institutions are highly variable and inconsistent; the data collected are not comparable. However, the narrative portions of the institutional level reports provide a rich, robust description of the services, programs and activities designed to serve underserved students, and the reports yield a great deal of information concerning the institutional level programs and services designed to recruit, retain and graduate underserved populations. The reports do not contain or provide consistent definitions of or data for underserved students, including low-income and first generation students. Most of the institutions provided some institutional level data concerning overall enrollment numbers of racially diverse students; in most institutional reports this data is disaggregated by race category.

### Underserved Students

Pursuant to SB 04-189 (section 23-5-135, C.R.S.), “underserved students” are typically those who represent racial minorities, are low-income, and/or first generation (the first generation label refers to students who are the first in their nuclear family to pursue post-secondary education; neither parents *completed* a baccalaureate degree). The DHE does not collect or maintain data on the numbers of first-generation students; however, the numbers of enrolled, first-generation students are maintained individually and at the institutional level of Colorado’s two and four-year institutions. For the purposes of this report, the term “underserved students” will be used generically to refer to students categorized into one or more of the above classifications.

### Colorado Minority Enrollment Data

The number and proportion of minority student enrollments at public institutions of higher education in Colorado grew from 38,304 (18.8% of total enrollment) in fall 2001 to 43,223 (20.3%) in fall 2005, a change of 4,919 or +12.8%. In-state minority student enrollments grew faster, from 34,953 (19.9% of total in-state enrollment) in fall 2001 to 39,626 (21.1%) in fall 2005.

At the undergraduate level, minority student enrollments increased from 19.7% in fall 2001 to 21.2% in fall 2005. However, during the same period, the proportion of minority student enrollments in graduate/first professional programs—11.4% in fall 2001 and 11.9% in fall 2005—lagged far behind that at the undergraduate level. Among all institutions, the largest minority student enrollments in fall 2005 were at Metropolitan State College of Denver (5,006) and the Community College of Denver (4,279). The largest proportions of minority student enrollments were at the Community College of Denver (48.1% of total enrollment) and the Community College of Aurora (39.9%).

Please refer to Table 1 for a graphic presentation of the Colorado Minority Enrollment Data, and Table 2 for Colorado Minority Enrollment Data, by Institution.

### Colorado Low-Income and First Generation Enrollment Data

For purposes of this report low-income will be defined by identifying and quantifying Pell Grant eligible students. In other words, Pell-eligibility will be used as a proxy to identify students labeled as “low-income”. Typically, students from families earning less than \$35-\$40K, depending on family size and circumstances, are considered “low income”.

The first generation label refers to students who are the first in their nuclear family to pursue post-secondary education, that is, neither parent *completed* a baccalaureate degree. Of the institutions reporting on their numbers of first generation students, most obtained the information through an amalgamation of data collected from the Free Application for Federal Student Aid (FAFSA), from questionnaires provided at campus orientation sessions or from self-identification on admissions applications.

The Colorado School of Mines, The University of Northern Colorado, Mesa State College and Colorado State University Pueblo did submit data concerning the enrollments of both low-income and first generation students. Fort Lewis College, Metropolitan State College of Denver, Adams State College, Western State College, the CU system institutions, (UCB, UCDHSC, and UCCS), the Colorado Community College System, Colorado Mountain College and AIMS Community College did not provide enrollment data concerning low-income and first generation students.

\*Low-Income and First Generation Students, 2004-2005

<b>Institution</b>	<b>Low-Income</b>	<b>First Generation</b>
Mines	17% (of all enrolled students)	---
UNC	---	39% (of newly enrolled freshman)
MSC	54% (of all enrolled students)	29% (of all enrolled students)
CSU-P	35% (of all enrolled students)	80% (of all enrolled students)

\*The submission of this specific data was not a reporting requirement of HB06-1024, therefore, not all institutions provided the information.

Table 1: Colorado Minority Enrollment Data, by Race/Ethnicity, 2001-2005.

## HIGHLIGHTS FROM INSTITUTIONAL REPORTS

Though varying in scope and focus, all public institutions in Colorado provide some form of institutional activities, programs and services to support underserved students. The types of programs offered by the state's public institutions can be classified as pre-collegiate, academic, financial and social/cultural programs.

### Precollegiate programs

One of the most widespread services for the support of underserved students provided by public colleges and universities in Colorado is pre-collegiate programming. Pre-collegiate programming involves outreach and support to underserved middle and high school students. Many such programs administered by Colorado institutions are funded by federal TRIO grants with occasional matching funds provided by the host institutions. Nonetheless, institutions have also developed their own activities to reach out to underserved students and in some cases have fully institutionalized TRIO-type support programs in the absence of continued, longitudinal funding from the federal government. Please note that TRIO's history, programs and approach to recruitment, retention and graduation of all underserved student populations is described in greater detail later in this report.

Many of the pre-collegiate services are joint efforts occurring between post-secondary institutions and local middle, junior and high schools within the state's K-12 education system. Most of the pre-collegiate programs involve ongoing academic and curriculum support at the K-12 level in combination with varying degrees of exposure to various post-secondary education options. The ultimate goal of the pre-collegiate programs is to ensure a pool of college and university-ready students who are both academically and socially prepared to pursue both the rigor and cultural milieu of post-secondary education.

It is important to note that most of the post-secondary institutions within the state offer some degree of pre-collegiate programming and services. Some examples of current, active programs within the state are provided below.

The Colorado School of Mines administers a program called SUMMET (Summer Minority Engineering Training Program), a summer campus residential program established in 1970 and since institutionalized by the School that seeks to expose 11<sup>th</sup> and 12<sup>th</sup> graders to post-secondary and Science, Technology, Engineering and Math (STEM) programs. The University of Colorado administers a self-funded program called CU Pre-Collegiate. This program serves nearly 2,000 students each year at a total cost of nearly \$1M. In the San Luis Valley, Adams State College (ASC) runs two programs, PAVE (Partners Advancing Valley Education) and TITLES V Outreach and CELT (Center for Excellence in Learning and Teaching). The former is a federally funded project designed to increase institutional capacity to better serve Hispanic/Latino students, while the latter is a federal grant which supports retraining 20% of the ASC faculty each year in learner-centered classroom practices and instructional technology. Both the University of Northern Colorado and Fort Lewis College have positions in their offices of admission dedicated exclusively to minority student enrollment. Also within its office of admission, Colorado State University created a program

entitled (STARS-Schools Targeted for Admission and Retention Services), which targets for intensive recruitment efforts a number of high schools with particularly large numbers of low income and minority students.

**TRIO Programs** (excerpted from the Office of Postsecondary Education website)

The first reauthorization of the Higher Education Act in 1968 prompted the TRIO label that continues to be used today. TRIO referred to the three programs: Upward Bound, Talent Search, and Student Support Services, which existed within this reauthorization of the Higher Education Act designed to assist eligible students to begin and complete a post-secondary education.

Upward Bound was created by the Educational Opportunity Act of 1964, the original War on Poverty statute. Upward Bound assists eligible students (low-income, first generation, minority students) and veterans as they prepare for higher education. Talent Search was created by the original Higher Education Act of 1965. Talent Search programs serve young people in the sixth through twelfth grades and assists them in gaining a greater awareness of various educational options and opportunities. When the 1968 reauthorization of the Higher Education Act created Student Support Services and transferred Upward Bound out of the Office of Economic Opportunity into the Higher Education Act, the TRIO label was created. Student Support Services helps eligible students to stay in college until they earn their baccalaureate degree.

Although "trio" means three, TRIO is actually five programs under one umbrella. The second reauthorization of the Higher Education Act of 1972 created the Educational Opportunity Centers. Educational Opportunity Centers primarily serve displaced or underemployed workers by helping them to choose a college and a suitable financial aid program. It took 22 years, from 1964 to 1986, to construct the current array of TRIO programs. TRIO is our nation's commitment to the dream of education for all Americans regardless of race, ethnic background or economic circumstances. To that end, federal TRIO programs are educational opportunity outreach programs designed to promote and support students from disadvantaged backgrounds. TRIO includes six outreach and support programs targeted to serve and assist low-income, first-generation college students, and students with disabilities to progress through the academic pipeline from middle school to post baccalaureate programs. TRIO also includes a training program for directors and staff of TRIO projects and a dissemination partnership program to encourage the replication or adaptation of successful practices of TRIO projects at institutions and agencies that do not have TRIO grants. TRIO programs by institution are provided on page 10.

### Academic Programs

The ability of underserved students to persist in the competitive postsecondary academic environment is understandably a high priority at colleges and universities. As demographics continue to change, especially in the western states of the United States, post-secondary institutions have become critically aware of internal, institutional infrastructure and the provision and availability of support services for underserved students. To that end, academic support programs take many forms at Colorado's public colleges and universities, most often fashioned in a manner consistent with the institutions' roles and missions and reflective of the institution's geographical service region.

The hallmark of most of the academic support programs is a quadruple grouping of academic support services that combines ongoing, consistent advising and counseling, tutoring support, course clustering/cohort building and some degree of mentoring. Many TRIO programs across the state served as some of the first model programs for the establishment and delivery of academic support services to both historically underrepresented, underserved students as well as the general student population.

Ongoing, consistent academic advising allows students to meet frequently with both student peer advisors as well as faculty advisors in order to refine course schedules, establish academic plans and stay within a 4-6 year graduation timeline. Tutoring in the form of individual, one-on-one tutoring by both peers and faculty enables students to maintain high grade point averages, or remediate, as is necessary on an individual student by student basis. Supplemental Instruction programs provide group tutoring for entire course enrollments when courses are identified as having consistently high failure rates. Other elements of academic support on our state's college and university campuses include academic support structures designed to directly impact the delivery of curriculum.

For example, course clustering and cohort building occurs on college and university campuses when course schedules are offered as a bundle of thematically-linked courses designed to fulfill both general education as well as major and minor requirements. Course clustering enables students to successfully link both reading and writing assignments across the curriculum, while faculty are extended the opportunity to provide instruction in more of an interdisciplinary, competency-based manner. Cohort building occurs by design within the clustering of thematically-linked courses and serves to promote peer-mentoring, the formation of study groups and additional peer support, as cohorts of the same students move from semester to semester taking the same classes as a group.

Originally embarked upon as part of the Freshman Year Experience (FYE)- any collection of academic support services designed to improve the freshman experience and retention rates, the clustering of courses and cohort building has proven to be a highly effective retention tool, especially for typically underserved students. Another feature of many campuses academic support structures is mentoring.

Mentoring serves as an occasional feature of many programs designed to serve historically underserved students. Many of the retention programs featured in most of the programs submitted by the state's post-secondary institutions employ some degree of mentoring, either using other students as peer mentors, faculty or, as in the case of the CUMBRES program at UNC, mentors from the surrounding community.

Finally, many institutions have moved to establish Learning Communities. Learning Communities take the course clustering concept combined with the cohort building it naturally produces and extend the experience to dormitory living. Programs, again, such as UNC's CUMBRES program, have exclusive dorm room space (or entire dorms) dedicated to housing students who participate in one of the course clustering programs. The program has demonstrated increased retention and serves to especially enhance the success of underserved student populations. In addition to UNC, the Learning Community concept is offered at CSU-Fort Collins as well as other institutions across the state.

Examples of various academic support programs are provided below:

The Colorado School of Mines, the state's most selective institution, offers programs such as the Minority Engineering Program (MEP), which is geared toward assisting minority students through the rigors of science, math and engineering programs in an inviting and culturally sensitive manner. Other campuses, such as the Metropolitan State College of

Denver and Fort Lewis College, focus their efforts on addressing academic deficiencies common to students enrolling at their campuses. Finally, some institutions have joined together to better serve the “pipeline” of students who begin at one institution and eventually transfer to another. Such partnerships exist between the University of Colorado at Denver Health Sciences Center and the Community College of Denver as well as between Colorado State University at Pueblo and Pueblo Community College. Strong transfer linkages also exist between AIMS Community College and the University of Northern Colorado, as well as Front Range Community College and Colorado State University at Fort Collins.

### Financial Programs

One of the most significant barriers to access to postsecondary education is financial assistance, especially in recent years as the costs of tuition and fees for students and parents have risen steadily, outpacing growth in both average personal income and state Gross Domestic Product (GDP). Importantly, minority and low-income students often respond differently to various types of financial aid compared to middle- and high-income students and non-minority students. Specifically, many minority and low-income students tend to respond positively to grants and scholarships but not to loans. To address this, all institutions have need-based grants programs in addition to those provided by the state (Colorado State Grant, Governor’s Opportunity Scholarship, etc.), though funding for these institution-based aid programs remains low.

Several institutions reported the Daniels College Prep and Scholarship Program and the Daniels Opportunity Award Program are having noteworthy impacts on their financial support of underserved students. Additionally, at least two institutions, Colorado State University and Fort Lewis College, reported having successful scholarship programs targeted toward first generation college students. And, the University of Colorado system reported successes associated with its CU Pre-Collegiate Scholarship program.

Overall, there has been a state-wide push in state aid to low-income students, resulting in a shift in the amount of aid availability from merit-based scholarships and aid to need-based aid.

Though not mentioned in the institution’s report as it is not a program *per se*, Fort Lewis College (FLC) provides free tuition and fees to Native American students. This aspect of support to and for underrepresented Native students is an integral part of the FLC mission, as they were originally established as a Tribal School. More than 700 students participate in this program.

### Social/Cultural Programs

Though the academic and financial programs offered by institutions to support underserved students are critical, those programs designed to support students’ social and personal growth can be equally influential. Nearly all institutions provide programs designed to develop underserved students’ personal and social development. Most social/cultural offerings on our state’s campuses exist as administrative units, programs, services or activities.

Some examples of administrative units on our state's college and university campuses include cultural centers. The campus cultural centers are physical locales where students can go to interact with students similar to themselves or talk to advisors and mentors in a culturally sensitive and welcoming environment. Campus cultural centers serve as a nexus for cultural diversity, linking institutional academics with social/cultural programming while serving the dual purpose of accommodating minority culture students and promoting diversity among the majority campus culture. Cultural Centers exist at several campuses around the state, including at UNC, WSC and CSU-FC. Similarly, some campuses offer advocacy offices, administrative units designed to support the recruitment, retention and graduation of underserved students, (such as The Academic Advancement Center at CSU-Fort Collins).

Additionally, many campuses centralize funding in order to provide programs, services and activities that are designed and serve to enhance the culture and climate of the institution. The social and cultural programming is administered within the larger context of the academic and learning environment, complimenting the students' overall college and university experience, both academically and socially.

Many campuses feature social/cultural programming that is designed to strengthen the ties between and among multiple campus units as well as the community surrounding the institution. Most campuses highlighted social/cultural programs that linked academics, faculty, various student support services as well as the local K-12 and greater, surrounding community.

One of the goals of the social/cultural programming is to foster a greater depth of understanding of both majority culture and the collective cultures of smaller groups on campus. A secondary goal of the social/cultural programming is to shepherd a meaningful facilitation of the process of understanding how the various campus groups and stakeholders interact, collectively, on college and university campuses.

Finally, most institutions support student-lead organizations that serve to enhance both the overall campus milieu while fostering a campus culture and climate that is conducive to the success of all students, with a particular focus on underserved populations.

Some examples of social and cultural programming at our various state post-secondary institutions include: The Colorado School of Mines Women's History Luncheon, UNC's Women's History Month and Cesar Chavez Week, UCDHSC's Minority Health Professions Opportunity Day, WSC's Amigos Club, (a group of campus students dedicated to providing free English as a Second Language tutors for the local and surrounding K-12 education system), and the Black Issues Forum at CSU-Fort Collins, a leadership program that was developed in collaboration with African American community leaders and agencies. The program, designed for high school juniors, is a summer residential program designed to enhance leadership abilities and to develop written and oral communication skills. The Forum serves the dual purpose of pre-collegiate programming.

### **Proposed Programs or Services**

The list of proposed programs and services (see Table 2a) is revealing, as most institutions propose not additional "add-on" programs, but rather funding for programs that augment

and compliment existing programs and services. By far the most universal proposal was that for additional financial aid support—grant, scholarship, and work-study. Another common request was that for targeted student academic support services. Following a case management-like approach, several institutions—University of Northern Colorado, Mesa State College, Fort Lewis College, Adams State College, and Colorado State University at Pueblo—proposed creating intensive, specialized programs to provide one-on-one counseling, tutoring, and basic skills development for underserved students. Finally, one college acknowledged the need for but difficulty involved in hiring minority faculty. Western State College proposed increasing faculty salary levels in order to better compete for minority faculty, who are coveted by most institutions, and therefore difficult to attract to smaller, regional state colleges.

**Table 2a: Proposed Programs and Estimated Associated Costs, By Institution, 2006**

Adams State College	Comprehensive Learning and Testing Center	\$650,000
	Expanded Daycare	\$200,000
	Increase Peer Mentors and Tutors in Basic Skills Courses	\$75,000
	Increase Scholarship Funds	\$100,000
Aims Community College	Pilot Student Achievement and Retention Program	\$150,000
Colorado Mountain College	Improve Academic Transitions for ESL Students	--
	Improve Academic Transitions for Basic Skills Students	--
	Create Spanish Language Sections on CMC Website	--
	Create College-wide Academic Alert System	--
Colorado School of Mines	K-12 Math, Engineering, and Science Achievement (MESA)	\$210,000
	Peer and Mentor Support	\$56,000
	Summer Education Programs	\$184,000
	Scholarships and Fellowships	\$110,000
Colorado State University	Expand Existing Precollegiate Summer Programs	\$100,000
	Create Financial Aid Awareness Program	--
	Augment Existing Partnerships with Minority Institutions	\$50,000
	Develop Culturally-responsive Curricular and Co-curricular Advising	--
Colorado State University at Pueblo	Centralized Tutoring Center	\$170,400
	Summer Bridge Program	\$75,000
	Science Learning Center	\$150,000
	Develop Chicano Studies Program	\$50,000
	Fund Students in Free Enterprise Program	\$4,000
	Expand Summer Business Academy	\$25,000
Fort Lewis College	Office of Underserved Students	\$200,000
	Need-based Grants	\$258,000
	Campus Employment	\$270,000
	Non-traditional Student Center	\$50,000
	Enhance Cultural Centers	\$100,000
	Learning Support Programs	\$25,000
	Additional Summer School Courses	\$100,000
	Weekend Courses	\$100,000
	"Total Support" Program	\$271,072
	Facility for Newly Proposed Programs	\$5 - 8 M
Mesa State College	Project Right Start (first generation student program)	\$850,000
	Daniels Opportunity Scholarship Program	\$5,000
	Native Teachers Program	--
University of Colorado at Boulder	Increase Financial Aid for Graduate and Professional Students	--
	Increase Financial Aid for Undergraduate Students	--
	Improve and Expand Pre-Collegiate Programs	--
	Increase Scholarship Funding for Pre-Collegiate Program Completers	--
University of Northern Colorado	Academic and Cultural Planning	\$1,950
	Disability Support Services	\$181,800
	Minority Student Recruitment	\$55,460
	Renovation of Center for Human Enrichment/McNair Program	\$612,000
Western State College	Increase Funds for Salaries to Better Compete for Minority Faculty	--
	Increase Multicultural Services Staff	--
	Increase Scholarship Funds Targeted to Underserved Students	--
